SUNPROTECTION**TECHNOLOGY.**
ENGINEERED BY STEMESEDER.

STEMESEDER – YOUR SYSTEM PROVIDER FOR SUN PROTECTION SYSTEMS.

Sun protection can do more than just protect you from the sun.
One of the essential tasks is to use the effect of the sun.

Sun protection is used to design rooms, increase comfort and can
can fully exploit potential in terms of energy efficiency.

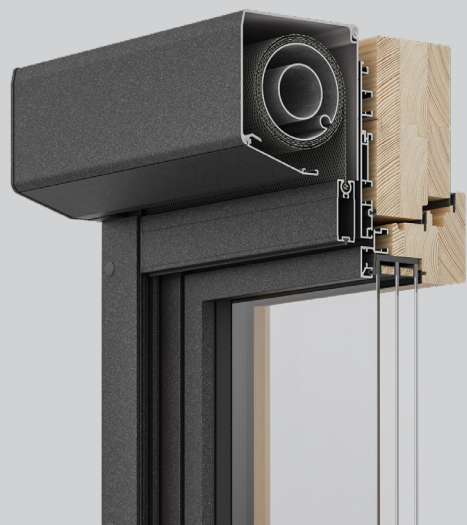

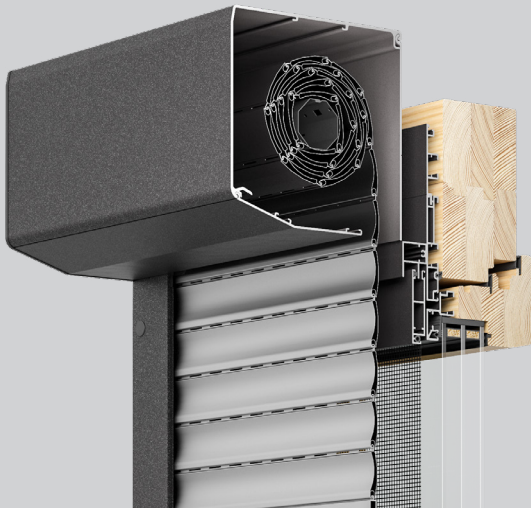

Windows ensure contact with the outside world.
With modern sun protection, daylight can be directed through adjustable slats,
to prevent glare and control the lighting in the room.

Sun protection protects against heat and – above all – it protects our privacy.

Whether roller shutters, venetian blinds or ZIP screen - STEMESEDER offers a fully comprehensive
product range of sun protection systems.

All systems can be placed on windows - both in new buildings and in renovation.
The highly weatherproof aluminum surfaces in STEMESEDER PREMIUM quality match the aluminum
shells of the windows exactly.

STEMESEDER **SUNTEC** STEM SUN PROTECTION SYSTEMS FOR SUBSEQUENT INSTALLATION

STEMESEDER – YOUR SYSTEM PROVIDER FOR SUN PROTECTION SYSTEMS. FOR SUBSEQUENT INSTALLATION

The STEMESEDER-SUNTEC systems for attachment mounting are - each as roller shutter, venetian blind lamellae or ZIP screen systems -available in versions with cleaning box or sight box.

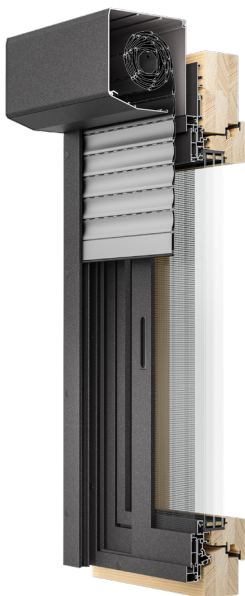

The external venetian blind systems are optionally available with C slats (for RAVO and RAPE) or Z slats (only with system RAPE).

Stem systems can be retrofitted - without far-reaching façade interventions.

FOR THE NEW INSTALLATION

8

STEMESEDER – YOUR SYSTEM PROVIDER FOR SUN PROTECTION SYSTEMS. FOR NEW INSTALLATION

The STEMESEDER-SUNTEC systems for the installation of new buildings are - with roller shutters, Venetian blind slats, or ZIP screen systems - in the versions with plaster box or viewing box S and E available.

The sophisticated complete system provides solutions for almost all installation situations. Various plaster rails enable technically perfect building connections with optimal integration into the facade.

15

STEMESEDER SUNTEC MOTOR DRIVES

Maximum convenience – at the push of a button.
Or fully automatic.

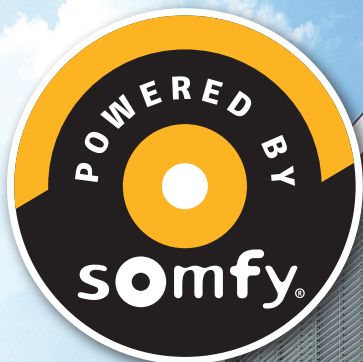

As if by magic...

Sun protection is only complete with the drive.
On the one hand increases the opening and closing up
at the touch of a button:
In the case of a large number of windows, the manual
operation turns quickly into real work.

There are many more intelligent functions that a modern motor control can take over if desired. A fully-fledged sun protection system can be equipped with sensors for brightness, temperature or time. This controls the personal feel-good room climate fully automatically. All of these functions run almost silently thanks to the ultra-quiet drive modules.

The current state-of-the-art can be very flexibly adapted to personal requirements – from a simple motor drive to fully automatic.

STEMESEDER – YOUR SYSTEM PROVIDER FOR SUN PROTECTION SYSTEMS.

They hum, buzz, annoy - and sting! Protect yourself and your family and simply banish the winged pests from your bedroom and living room. Lockout is definitely more effective - and healthier - than any chemical bludgeon!

STEMESEDER now offers a comprehensive range of high-quality insect screens systems - choose from the variants sliding frame, rotating frame clamping frame or roller blind. The close-meshed grids keep even the smallest insects outside safely.

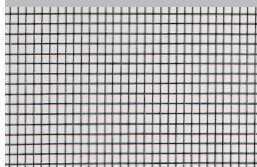

All systems can be placed on windows - both in new buildings and in renovation. The highly weatherproof aluminum surfaces in STEMESEDER PREMIUM quality match the aluminum shells of the windows exactly.

STEMESEDER WINDOWSILL SYSTEMS

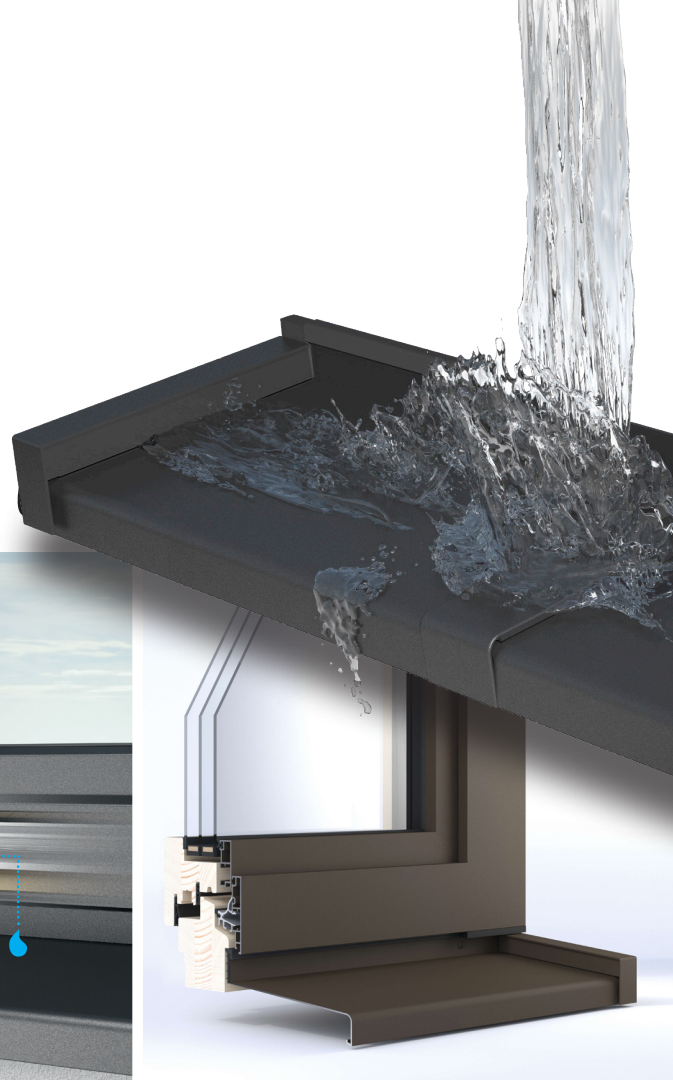

24

A Sealed sliding rib

B Sealing bridge

STEMESEDER – YOUR SYSTEM PROVIDER FOR WINDOWSILL SYSTEMS

STEMESEDER PREMIUM PQS – simply sealed!

Our windowsill system is the optimal solution for the highest demands on function, quality, and appearance. The system-wide integration of a perfect driving rain seal between Windowsill, window, and masonry was the primary development goal. Together with the indestructible GS premium surface quality, the large variety of colors and an excellent price-performance ratio, PREMIUM PQS is the first choice for builders with premium requirements.

What makes the SLIDING SEAL PREMIUM PQS aluminum so special?

Perfect sealing to the masonry:

Tested with a driving rain tightness of 1,950 Pa for a non-ventilated one Facade. Just tight - no more Sealing measures required!

Thermal expansion of the windowsill is absorbed in the sealing/sliding flange without damaging the structure.
